One of the pillars of freedom is economic freedom. This is a vital concept for all people, but especially vital to we descendants of Africa trying to make our way here in America. We must explore all avenues that promise to increase our level of competency of gaining wealth and maintaining it for the generations yet born.

Your presentation on the establishment of a Corp. Sole creates the seal for the intention for freedom by providing steps that are easy to understand and implement, even for a lay person. The information was presented confidently and clearly with the necessary details.

Your explanation of the sole corporation, its history, and its maintenance was well informed, yet easy to understand. I applaud your knowledge, your detailed research on the material and your desire to assist our community in the implementation of the process.

Thank you for conducting the "corporation sole" seminar. It was very informative, offering an abundance of "how to" clarity, and was definitely a wise investment of time.

I believe your seminar is invaluable to anyone who is in search of being free to conduct their affairs. Please continue to spread the knowledge.

Highest Regards,

Rev. Richard Meri Ka Ra Byrd
